Commentary

Increase of 3.64% compared to the corresponding period last year, Q2'21
Growth of 7.30% compared to the previous quarter, Q1'22

The latest Q2 2022 CAA grind represents a new record grind for the quarter and is the 2nd highest grind in the history of the CAA. The strong number is testament to the resilience of demand for high quality cocoa and chocolate products from the region despite challenges from supply chains and macroeconomic factors.
